

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-23752

Stream : Ohio River

Applicant : Ronald Greves
718 West Main Street
Madison, IN 47250-3105

Description : An existing residential structure will be replaced with a new elevated residential structure with a 36' x 38' concrete enclosure underneath. The new structure will have a finished floor elevation of 464.3' NGVD 1929. Details of the project are contained in information and plans received at the Division of Water on April 10, 2006.

Location : Approximately 1400' (along Walker's Landing Road) southeast of the River Road and Walker's Landing Road intersection and 50' south
near Madison, Hanover Township, Jefferson County
SW¼, SE¼, NW¼, Section 18, T 30N, R 10E, Madison West, IN-KY Quadrangle
Quad Code: 3808564
UTM Coordinates: Downstream 4284750 North, 634375 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Application # : FW-23782

Stream : St. Joseph River

Applicant : Larkin and Ann Lail
130 Pottawattomi Drive
Elkhart, IN 46516-3011

Description : A 4' high chain link fence will be constructed around a total of 220' of the applicant's back yard. Details of the project are contained in information and plans received at the Division of Water on April 11, 2006.

Location : 130 Pottawattomi Drive, lot 3; property extends approximately 20' to 70' east and 20' to 195' north of the intersection of Pottawattomi Drive and 2nd Street
DOWNSTREAM: near Elkhart, Concord Township, Elkhart County
NE¼, SE¼, NW¼, Section 5, T 37N, R 5E, Elkhart Quadrangle
Quad Code: 4108568

30 Day Public Notice Report

Application # : FW-23783

Stream : Unnamed Tributary
Buttermilk Creek

Applicant : *Indiana Department of Transportation
Richard Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing 12' x 12' x 46' concrete box culvert will be replaced with a new culvert. The new crossing will consist of a 24' x 4' x 65' long concrete box culvert set in concrete headwalls. The new culvert will have an upstream invert of 485.96', National Geodetic Vertical Datum (NGVD '29) and downstream invert of 485.53', NGVD. The culvert and headwalls will be perpendicular to the roadway. Minor channel shaping will occur both downstream and upstream of the new culvert. The shaping will be confined to the construction right-of-way at the upstream end. The reshaped areas will be stabilized with an 18" thick layer of limestone riprap placed over a geotextile fabric. The roadway elevation will not be changed. The centerline elevation of the new roadway will be at 494.29' NGVD. Details of the project are contained in information and plans received at the Division of Water on April 11, 2006.

Location : Beginning 30' upstream of State Road 54 and continuing downstream about 100' near Dugger, Cass Township, Sullivan County
NE¼, NW¼, SE¼, Section 3, T 7N, R 8W, Dugger Quadrangle
Quad Code: 3908713
UTM Coordinates: Downstream 4325126 North, 475450 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-23784

Stream : Wabash River

Applicant : Harrison Steel Castings Co
Pete Bodine
900 Mound Street
Attica, IN 47918

Description : An existing 1250' by 400' Type III Restricted Waste Disposal facility (landfill) will be expanded horizontally 400' north at the east boundary down to 100' north at the west boundary, and vertically the top of the fill will be at an elevation of 560' NGVD. The proposed expansion area is bounded by the existing landfill to the southeast, a riverside levee along the Wabash River to the northwest, and an existing mound to the northeast. Details of the project are contained in information and plans received at the Division of Water on April 11, 2006.

Location : At Wabash River Mile 286.3 along the left overbank
DOWNSTREAM: near Attica, Logan Township, Fountain County
N½, NE¼, Section 12, T 21N, R 8W, Williamsport Quadrangle
Quad Code: 4008733
UTM Coordinates: Downstream 4459432 North, 477258 East

30 Day Public Notice Report

Application # : FW-23785

Stream : West Fork White River

Applicant : Veolia Water Indianapolis, LLC
Dominique Halloran
1220 Waterway Boulevard
Indianapolis, IN 46202-2157

Description : A new ground water treatment facility will be constructed landward of the floodway along the West Fork White River. Floodway construction activities include 24" water supply line from the new well field area, 8" surface water residual force main, new surface water residuals pump station, new water well to surface water treatment plant control structure, 24" pipe to existing sedimentation lagoons, an addition to an existing access road and modifications to piping at existing lagoon effluent flow monitoring structures. Details of the project are contained in plans and information received at the Division of Water on April 11, 2006 and April 27, 2006.

Location : at the existing White River North Surface Water Treatment Facility on a tract of land between River Avenue, East 122nd Street and the West Fork White River
DOWNSTREAM: near Carmel, Clay Township, Hamilton County
S½, SE¼, Section 34, T 18N, R 4E, Fishers Quadrangle
Quad Code: 3908681

UTM Coordinates: Upstream 4423603 North, 580901 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-23786

Stream : Ohio River

Applicant : GE Plastics Mt. Vernon, Inc.
Dave Perkins
One Lexan Lane
Mt.Vernon, IN 47620-9364

Description : Approximately 810' of the Ohio River's eroded streambank will be stabilized with end dumped rip-rap laid over a geotextile fabric to protect the bank from further erosion. The rip-rap will be keyed into the streambed at the normal pool elevation. Details of the project are contained in information and plans received at the Division of Water on April 11, 2006.

Location : Approximately 1,000' west (right) of the Ohio River mile marker 830
DOWNSTREAM: near Mt.Vernon, Black Township, Posey County
NW¼, NE¼, NE¼, Section 18, T 7S, R 13W, Mount Vernon, IN-KY Quadrangle
Quad Code: 3708788
UTM Coordinates: Downstream 4197175 North, 419900 East

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-23788

Stream : Mill Creek

Applicant : *Indiana Department of Natural Resources
Larry Wayland, PE
Division of Engineering
402 West Washington Street, Room W299
Indianapolis, IN 46204-2739

Description : Improvements will be made to the Augusta Lake Dam. The improvements will include raising the dam embankment height approximately 3.4' and flattening the downstream slope of the dam embankment to a minimum slope of 3:1 by adding engineered fill. A toe drain will be included in the reconstructed dam embankment to intercept potential embankment seepage. A 150' wide emergency spillway will be constructed in natural undisturbed material at the right (east) abutment of the dam. The existing drop inlet primary spillway will be removed and a new drop inlet spillway consisting of 4' x 4' polymer concrete riser structure with approximately 78' of 3' diameter polymer concrete pipe constructed through the left dam abutment. In addition, erosion protection will be placed on the upstream face of the dam to minimize erosion from wave action. A small wetland area at the toe of the existing dam embankment will be impacted when the dam embankment is flattened. The wetland area will be mitigated on other Sugar Ridge Fish and Wildlife property since suitable areas near the project are not available due to the abandoned mine land conditions that existing in the immediate area. An estimated 5 trees located within the floodplain of Mill Creek and within the project area, will be mitigated by planting 25 2½" caliper trees on Sugar Ridge Fish and Wildlife property. Details of the project are contained in plans and information received at the Division of Water on April 13, 2006 and April 24, 2006.

Location : Augusta Lake at the Sugar Ridge Fish and Wildlife Area
DOWNSTREAM: near Augusta, Marion Township, Pike County
S½, NW¼, NW¼, Section 15, T 2S, R 7W, Augusta Quadrangle

30 Day Public Notice Report

Application # : FW-23789

Stream : West Fork White River

Applicant : City Of Anderson
Rob Sparks
PO Box 2100
Anderson, IN 46018

Description : Approximately 775' of the river's eroded bank will be restored to a 2:1 slope and protected with riprap. Excavated soils are to be contained on a temporary basis behind the top of bank and prevented from re-entry into the river by use of silt fencing. Fabric encapsulated compacted soil lifts using excavated soils will be installed at a 3:1 slope with revegetation and brush layer stabilization along the embankment above the ordinary highwater mark. Root wads are also to be installed to promote further stabilization. The width of disturbance will generally be 30'-50'. A buffer strip of native forbes, grasses and trees will be installed in conjunction with the project to establish an approximate 10 acre conservation easement. Details of the project are contained in information and plans received at the Division of Water on April 12, 2006.

Location : In the right (west) overbank beginning approximately 3750' downstream of the Madison Avenue stream crossing extending downstream about 775'
DOWNSTREAM: near Anderson, Anderson Township, Madison County
NW¼, NE¼, SW¼, Section 11, T 19N, R 7E, Anderson South Quadrangle

Application # : FW-23799

Lake : Eagle Creek Reservoir

Applicant : City of Indianapolis, Department of Public Works
Anne Marie Smrchek
604 North Sherman Drive
Indianapolis, IN 46201-2563

Description : The existing dam at Eagle Creek Reservoir is to be inspected, and maintenance performed where needed. The tainter gates are to be sandblasted clean and repainted. Repairs will be made to the trunnion anchorage platforms, and protection will be added to the trunnion arms. The existing lifting chains for the tainter gates are to be replaced. Piping and supports in both the control and meter buildings will be sandblasted clean and repainted. A temporary cofferdam will be installed to complete the maintenance and will be removed upon completion. the cofferdam consists of an aluminum slab that is slid between the existing braces on the inside face of each pier. The cofferdam holds back the lake water while the maintenance is performed. All dust from sandblasting will be collected in a Best Management Practices manner to prevent discharge. A tarp or other plastic drop cloth will be used to collect the particles, which will then be disposed of as trash.
Details of the project are contained in information and plans received at the Division of Water on April 19, 2006.

Location : The dam structure on the south side of Eagle Creek Reservoir
near Clermont, Pike Township, Marion County
S½, SW¼, Section 15, T 16N, R 2E, Clermont Quadrangle
Quad Code: 3908673

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-23801

Stream : Williams Creek

Applicant : Veolia Water Indianapolis, LLC
Dominique Halloran
1220 Waterway Boulevard
Indianapolis, IN 46202-2157

Description : The existing dam requires major rehabilitation in order to function safely. The existing sheet pile dam has partially failed due to top bending stresses and seepage. The dam has also failed due to bank erosion and subsequent by-pass flow. The sheet piles also have become a debris trap which blocks significant flow. The purpose of the dam is to maintain an adequate water surface elevation for the water intake structure at the Broad Ripple Dam. The dam also provides grade control that prevents the current cut-off from eventually becoming the main channel of White River. The proposed rehabilitation will encase the existing sheet piles with concrete. The upstream face of the dam will be constructed at a 1:1 slope and the downstream face will be ogee shaped. The outlet works will consist of concrete and riprap apron. The energy will be dissipated in the hydraulic jump. Turbulence from the jump will be contained within the apron. Channel banks will be protected by a concrete wingwall and riprap armoring. The rehabilitated dam will maintain its current crest elevation of 711.99. A temporary dam will be placed both upstream and downstream of the existing dam during construction. Details of the project are contained in information and plans received at the Division of Water on April 19, 2006.

Location : Across Williams Creek Cutoff between Westfield Rd. and The White River
near Indianapolis, Washington Township, Marion County

Application # : FW-23802

Stream : Robb Creek

Applicant : CSX Transportation
Paul J Kurzanski
500 Water Street J-275
Jacksonville, FL 32202-4423

Description : The superstructure of the existing one-span bridges carrying CSXT rail line transporation over Robb Creek will be widened to the west to accommodate an additional set of railroad tracks to increase railroad capacity along the CE & D Subdivision which runs from Chicago to Evansville, Indiana. The existing 25 feet deck of the bridges will be increased by extending both the abutments and piers 22.5 feet downstream at the first bridge (milepost 250.8) and 15.0 feet upstream at the second bridge (milepost 251.3), thereby increasing the out-to-out width to 47.5 feet and 40.0 feet, respectively. The approach tracks will not be raised and there will be minimal work in the channel. Details of the project are contained in information received electronically at the Division of Water on April 20, 2006.

Location : The proposed railroad siding project extends from near SR 56 south of Hazleton to south of Steelman Chapel Road in Gibson County, Indiana. The project is located within the Patoka USGS quadrangle, Sections 18-22. The UTM coordinates of the approximate center of the project corridor are: UTM 16 451543E 4257975N. The proposed railroad siding is to be located on the west side of the existing CSXT main line track and will extend parallel to the existing track between milepost 249.5 and milepost 252.1. The limits of construction will extend an average of 50 feet from the centerline of the existing mainline. The two bridges to be widened over Robb Creek are located at milepost 250.8 and milepost 251.3.

Applicant : Northern Indiana Public Service Company
Brian Kortum
2723 East 1500 North
Wheatfield, IN 46392-8800

Description : An approximate 550'x 35' area of the stream will be dredged to a maximum depth of 3' below the existing ditch bottom or to an elevation of 644', NGVD to maintain adequate flow to the NIPSCO Schahfer Generating Station. All work associated with this project will be limited to the east side of Davis Ditch. The dredging will be performed as needed over a period of five years by a mechanical dredge. The excavated material will be sidecast along the east overbank where it will be dewatered. Details of the project are contained in information received electronically at the Division of Water on April 26, 2006.

Location : Beginning at the confluence with the Kankakee River and continuing upstream (south) for approximately 550'
near Wheatfield, Kankakee Township, Jasper County

Application # : FW-23808

Stream : Unnamed Tributary Clarks Creek

Applicant : West Central Conservancy District
Ron Goff
243 South 625 East
Avon, IN 46256

Description : Approximately 2620' of an existing 8" sanitary sewer line will be replaced. The new sanitary sewer will be placed at the same depth as the existing line and will vary in size from 8" to 12". The open excavation method will be used and the new line will be placed in the existing trench once the existing line is removed. Also, if existing manholes are damaged or deteriorated, they will be replaced. This project was originally permitted by the Indiana Department of Natural Resources (FW-21700) on March 27, 2002, but was not completed prior to the expiration date. Details of the project are contained in information received electronically at the Division of Water on April 26, 2006.

Location : Along the east bank at County Road 100 South approximately 480' east of Dan Jones Road (County Road 800 East) and continuing downstream for approximately 2754'
near Avon, Washington Township, Hendricks County
Section 13, T 15N, R 1E, Plainfield Quadrangle

South Bend, IN 46601-1830

The Troyer Group
Christopher L Waidner
550 Union Street
Mishawaka, IN 46544-2346

Description : A new 10' wide 3" thick bituminous path on a 6" compacted aggregate base. The total length of the trail will be approximately 9225'. Included in the project is a 10.5' wide prefabricated prestressed hollow core concrete boardwalk, and a cast-in-place concrete pier. Both structures will be supported by piers which will be constructed within the flood plain. Details of the project are contained in information received electronically at the Division of Water on April 27, 2006.

Location : Beginning at the northwest corner of the Angela Street Bridge thence heading north along the western bank of the St. Joseph River for 9225' ending at the intersection of Oakwood Blvd. and Riverside Drive
at South Bend, Portage Township, St. Joseph County

Stream : Elkhart River

Applicant : Northern Indiana Public Service Company
Brian Kortum
2723 East 1500 North
Wheatfield, IN 46392-8800

Description : An 8-inch diameter plastic line will be placed beneath the Elkhart River to provide natural gas. The existing 6-inch steel pipe will be replaced due to a conflict with a proposed public improvement project. The line will be installed using directional boring technology. It will have 15 ft of cover beneath the streambed and approximately 28 ft in the banks. It will extend from upland to upland. The bore length will be approximately 340 ft, and the exit and entry points will be approximately 125 ft from the banks edge. The installation of the pipe will occur on the north side of Elkhart Avenue. The bore pits will be restored to pre-disturbance ground contours following construction. Details of the project are contained in information received electronically at the Division of Water on April 27, 2006.

Location : North of Elkhart Ave at the Elkhart River
at Elkhart, Concord Township, Elkhart County

Lake : Lake George

Applicant : Hobart Parks & Recreation
Vic Levan
111 East Old Ridge Road
Hobart, IN 46342-4357

Description : A new seawall will be constructed across 155' of the applicant's approximate 350' frontage. The wall will consist of 131' of driven sheetpiling and 24' of concrete cheekwall. It will vary in height from water level to several feet above water level as it curves away from the natural shoreline. The lakeward face of the wall will be at or above the normal shoreline. An 8' wide layer of revetment riprap will be placed a maximum of 4' deep at the base of the wall for toe protection. The remainder of the shoreline will be planted with native seed and plugs. Also, a floating dock will be placed in front of the concrete cheekwall described above. The 6' wide floating dock will extend 70' lakeward of, and perpendicular to, the legal shoreline of the lake. It will be connected to the shore at the concrete cheekwall with 7" by 7" by 3/8" steel angle irons containing 4- 11/16" by 1" slots, and will also be connected by a 1/2" grade 40 chain. Details of the project are contained in information received electronically at the Division of Water on April 20, 2006.

Location : Immediately west of the Hobart City Hall Parking Lot
near Hobart, Hobart Township, Lake County

Lake : Ball Lake

Applicant : Loren D Randall,
1240 Lane 201 Ball Lake
Hamilton, IN 46742-9316

Description : A new seawall will be constructed across 75' of the applicant's frontage to deter shoreline erosion. The wall will consist of Vinyl Pilings, which will be driven into the lakebed approximately 4' on the lakeward side. It will be 36" high and will be uniform in thickness at approximately 3/8" in height from the base to the top. The lakeward face of the wall will be at the legal shoreline. Deadman anchors will be installed every 4.5' along the wall. Back fill will be peagravel with 5" topsoil. Details of the project are contained in information received electronically at the Division of Water on April 24, 2006.

Michael L Williams
3333 North Wayne Street
Angola, IN 46703-7310

Brett Delancey
7045 West 300 North
Angola, IN 46703-9746

Description : An existing 30' wide, 560' long channel off Lake Sylvan will be restored to its original condition to improve navigation. Approximately 3' of accumulated muck and debris will be removed from the channel bed by dredging to a depth of 8' below the lake's legal level at the center of the channel and sloping uniformly to a depth of 3' at the shoreline. The excavated material will be transported to an upland containment area for dewatering and disposal. Water from the containment area will not be allowed to return to the lake. Color photographs, plans and specifications are enclosed in the application package. Details of the project are contained in information received electronically at the Division of Water on April 24, 2006.

Location : Lots # 10,11,12,13,14 in the amended Plat of Golden's Subdivision. Dredging to take place in channel located in front to above referenced lots.
near Angola, Millgrove Township, Steuben County
